

Computer Science GCSE Week 2 : Instructions for Debugging

log into github with username "gcsestudent2"

using hamburger menu at top left of screen, select "codespaces"

at bottom of screen click on "FirstCodespace"

wait upto a minute or so for the codespace to open

at top left of screen click on the pair of squares to open the "Explorer" pane

click on the "Program.vb" file to open it at the top right of the screen

put the code you want to try out in between the lines Sub Main End Sub

at bottom of screen click on the 4th tab called "TERMINAL"

type command "dotnet build ." after the \$ symbol to start the build process

if your code is OK you'll see "Build succeeded" in green and "0 Errors"

if your code is not OK you'll see "n Errors" in red text underneath an explanation of what it didn't like

if the build succeeded then on the left of the screen ..

.. click on the triangle with the little bug crawling across it to open the RUN AND DEBUG pane

click on the little green triangle next to the text ".NET Core Launch (console)"
